MEMORANDUM FOR: Deputy for National Intelligence  
Officers

SUBJECT : DIA Symposium on Soviet Military  
Doctrine and Strategy

1. With reference to our telephone conversation today concerning the DIA symposium, let me stress the following points:

- the timing of the first segment of the symposium (22-24 January) is particularly bad for all OSR analysts who might be

25X1

end of January. Incidentally, DIA analysts will also be involved in these activities. I would propose that the first segment of the seminar be postponed until February when all hands will be present and have the time to participate.

- as presently conceived, the second segment of the symposium will include contractor personnel and members of the academic community. These participants are not cleared for access to certain highly sensitive source material. Excluding this material would emasculate the briefings

CONFIDENTIAL

and discussions, and the conference will be no more than a rehash of well-worn material. I recommend confining the list of participants to those who have the proper clearances.

2. If you need any more information on this matter, please contact  25X1
